

QuaBoing® Resilient Rubber Surfacing!

For optimum safety in high-performance landscape designs.

QuaBoing® Resilient Rubber Tiles and QuaBoing® Loose Surfacing are aesthetically pleasing, durable, and long-lasting. ADA-compliant rubber tiles are well suited for locations requiring accessibility. Loose surfacing helps keep weeds at bay and does not attract animals or insects. It's also excellent for low-maintenance designs. Here are some suggestions:

Residential

- Around shrubs and trees
- Garden beds
- Paths and walkways
- Patios
- Play yards and swing sets

Municipal

- Public playgrounds
- Public parks
- Basketball courts
- School yards
- Skating rinks
- Municipal offices

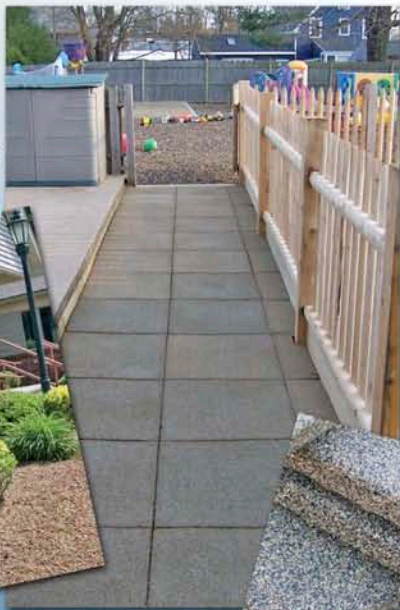

Commercial and Industrial

- Walkways and access points
- Fatigue matting
- High-traffic areas
- Break areas

Institutional

- Colleges and universities
- Private schools
- Public schools
- Camps
- Day care centers
- Places of worship
- Hospitals and nursing facilities

Play Hard. Land Safe!

QUA BOING®

Resilient Rubber Surfacing!

QuaBoing® Tiles and Loose Surfacing are ideal for playground safety, low-maintenance landscaping, and more!

Add a little bounce to your playground!
It's the safest playground surface available!

More than two thirds of playground injuries result from falls to the surface below, making it of utmost importance that you choose high-quality, impact-absorbing materials for your playground designs and installations.

QuaBoing® Resilient Rubber Tiles and QuaBoing® Loose Surfacing are the versatile, long lasting, low-maintenance solutions you've been looking for – providing an aesthetically pleasing cushioned surface that's both easy to install and safer under foot.

QuaBoing surfacing is made from all new materials in our own factory using the same genuine Vibram® rubber that sets the standard for safe soles for work boots and hiking boots around the world. It's color-fast, and available in black, tan, and a premium mix of earth tones.

Unlike surfacing made from recycled tires, QuaBoing does not contain carbon black, sharp shredded steel, or other potentially harmful materials.

Help your clients reduce the potential for injuries while they beautify their projects and properties. Specify and install QuaBoing® Resilient Rubber Surfacing!

Certification and Testing*

QuaBoing Resilient Rubber Surfacing meets or exceeds these important industry and government standards:

- Tiles: ASTM F1292-04 (Impact test)
- Tiles: ADA (wheel chair accessibility) ASTM F1951-99
- Loose Surfacing: exceeds ASTM F1292-04 (test for maximum fall height)
- Loose Surfacing: meets ASTM F963-03, paragraph 4.3.5 (ban on lead and heavy metals)

We are an IPEMA member and certification is in process. * For full details, please contact us.

MADE WITH PRIDE IN THE USA!

COMPARE THE
DIFFERENCE

QuaBoing Surfacing

- Made from all new pre-consumer material.
- Does not contain shredded metal, cord, or harmful debris.
- Manufactured under controlled conditions in our factory.
- Color is permanent and non-fading.
- Fire-resisting.
- Does not attract animals or insects.
- Supported with a 10-year warranty.

Used Tires

- Base material contains high levels of carbon black.
- Tires may contain steel belts and cords. Magnetic removal system is not 100% accurate.
- Recycled tires come from various manufacturers and are stored in bulk scrap yards. Less control of base materials creates potential for environmental contamination.
- Color may fade, bleach, or rub off. Highly marking, transferring to skin and clothing.
